1. Introduction to RailCab

1.1 What is RailCab?

RailCab is an integrated travel platform that combines **IRCTC train ticket booking** with **last-mile cab services** into a single seamless experience. Designed for Indian railway passengers, RailCab eliminates the friction of using multiple apps — one for train tickets and another for reaching home from the station.

Whether you are commuting to a city or travelling across states, RailCab ensures your cab is waiting at the station precisely when your train arrives. The platform is available as a **mobile application** (Android & iOS) and a **web portal**, offering the same core booking capabilities across both channels.

1.2 Key Benefits

Feature	Benefit
One-Stop Booking	Book your train ticket and cab in the same session — no switching between apps.
IRCTC Integration	Directly integrated with IRCTC's official NGET APIs for real-time fare, availability, and booking.
Smart Cab Timing	Cab is automatically scheduled to align with your train's arrival time at the destination station.
Razorpay Payments	Secure online payment via Razorpay supporting UPI, cards, net banking, and wallets.
PNR & Booking Tracker	Check live PNR status and manage all your bookings from a single dashboard.
TDR & Refunds	File Ticket Deposit Receipts (TDR) and track refunds directly from the app.
Vikalp Scheme	Opt in to IRCTC's Vikalp alternate train scheme for waitlisted passengers.
Multi-Platform	Available on Android, iOS, and Web — your data syncs across all devices.

1.3 Supported Platforms

RailCab is available on the following platforms:

- **Android App** – Android 8.0 (Oreo) and above
- **iOS App** – iOS 13.0 and above
- **Web Portal** – All modern browsers (Chrome, Firefox, Safari, Edge) — supports full train ticket booking and cab booking

- **Driver App** – Dedicated Android & iOS app for RailCab cab drivers

■ *The Web Portal offers the same train booking and cab booking features as the mobile app. All features described in this manual are available on both platforms unless specifically noted.*

2. Getting Started

2.1 Account Registration

New users must create a RailCab account to access booking features. Registration is available on both the mobile app and the web portal.

Registration Flow

1	Open App / Web Portal Launch the RailCab mobile app or visit the web portal in your browser.
2	Tap 'Register' On the home screen or login page, tap or click the Register / Sign Up button.
3	Enter Your Details Fill in: Full Name, Mobile Number, Email Address, and create a Password (minimum 8 characters).
4	OTP Verification A One-Time Password (OTP) is sent to your registered mobile number. Enter the OTP to verify your identity.
5	Account Created Your RailCab account is created. You are automatically logged in and redirected to the home screen.

Registration Requirements

- Valid Indian mobile number (used for OTP verification)
- Active email address (for booking confirmation emails)
- Password: minimum 8 characters
- Name as it should appear on bookings

2.2 Login & Authentication

Returning users can log in using their registered mobile number or email and password.

1	Open Login Screen Tap Login on the RailCab home screen or web portal.
2	Enter Credentials Enter your registered Email / Mobile Number and Password .
3	Tap Login Tap the Login button. The system validates your credentials securely.

4

Dashboard

On successful login, you are taken to the **Home Dashboard** where you can access all features.

■ If you forget your password, use the 'Forgot Password' option on the login screen. An OTP will be sent to your registered mobile number to reset your password.

2.3 Profile Setup

After registration, we recommend completing your profile to speed up future bookings.

- Navigate to **Profile** from the bottom navigation bar (app) or top menu (web).
- Tap **Edit Profile** to update your name, date of birth, and address.
- Link your **IRCTC Account** (see Chapter 8) — required for train ticket booking.
- Add **Saved Passengers** — frequently travelled co-passengers for quick booking.
- Verify your **email address** if not already done.

3. Train Ticket Booking

RailCab integrates directly with **IRCTC's official NGET (New Generation e-Ticketing) APIs** to provide real-time train search, fare enquiry, seat availability, and ticket booking. The train booking feature is available on **both the mobile app and the web portal** — with identical functionality across platforms.

3.1 Search for Trains

The Train Search feature allows you to find trains running between any two stations in India on a selected date.

How to Search for Trains

1	Go to 'Book Train' From the home screen (app or web), tap/click the Book Train Ticket option.
2	Enter From Station Type the source station name or code in the 'From' field. A dropdown list of matching stations will appear — select your station.
3	Enter To Station Type the destination station name or code in the 'To' field and select from the dropdown.
4	Select Journey Date Tap the date field and pick your travel date from the calendar.
5	Choose Class & Quota Select your preferred Travel Class (SL, 3A, 2A, 1A, CC, etc.) and Quota (General, Ladies, Senior Citizen, etc.).
6	Tap 'Search Trains' Tap the Search Trains button. RailCab queries the IRCTC API in real-time and displays all available trains.

Train Search Results

The results page shows all trains on your selected route. For each train you can see:

- **Train Number & Name**
- **Departure & Arrival time** from your selected stations
- **Journey Duration**
- **Days of Operation** (days the train runs each week)
- **Seat Availability** and **current fare** per passenger
- **Waitlist / RAC status** if applicable

■ You can also use the 'Trains Between Stations' feature to view all trains on a route without specifying a class — useful for planning.

3.2 Check Fare & Availability

After selecting a train from the search results, you can view detailed **fare and availability information** before proceeding to book.

- Tap any train from the results list to open the **Fare & Availability** details screen.
- The screen shows fare breakdown per passenger class: Base Fare, Reservation Charges, GST, and Total.
- Live **seat availability count** is shown for each class (e.g., Available 45, WL/2, RAC 3).
- You can switch between travel classes on this screen without going back to search.
- Tap '**Check Boarding Stations**' to view and change your boarding station if your train stops at multiple nearby stations.
- Once satisfied, tap '**Proceed to Book**'.

3.3 Passenger Details & Booking

This is where you enter the details of all passengers travelling on this ticket.

Filling Passenger Information

1	Number of Passengers Select the number of passengers (1 to 6 per booking).
2	Enter Passenger Details For each passenger enter: Full Name (as per ID), Age, Gender, and Berth Preference (Lower / Upper / Middle / Side Lower / Side Upper / No Preference).
3	Add Saved Passengers Tap 'Add from Saved' to quickly fill in details of passengers you have added to your profile.
4	Select Boarding Point Confirm or change the boarding station from the available boarding point options for this train.
5	GST Details (Optional) If you need a GST invoice, enter your GSTIN and company name.
6	Review Summary Review the complete booking summary — train details, passenger list, total fare, and departure time.
7	Validate & Check Fare RailCab performs a final fare validation with IRCTC to confirm the current fare before payment.

Important Before Booking

- Your IRCTC account must be linked to RailCab before booking train tickets (See Chapter 8).
- Ensure passenger names match exactly as on their government-issued ID proof.

- Passengers above 60 years may be eligible for the Senior Citizen quota.
- Children below 5 years travel free (no berth). Children 5–11 years pay half fare.

3.4 Payment Flow

RailCab uses a secure two-step payment process involving **Razorpay** for collecting your payment and **IRCTC's WebView booking bridge** for completing the actual ticket booking.

Complete Payment Flow

1	Order Created RailCab creates a Razorpay payment order with the exact booking amount.
2	Payment Screen Opens The Razorpay checkout screen appears. Select your preferred payment method: UPI (GPay, PhonePe, Paytm), Debit/Credit Card, Net Banking, or EMI.
3	Complete Payment Enter your payment details and complete the transaction. Your payment is processed securely by Razorpay (PCI-DSS compliant).
4	Payment Verified RailCab's backend verifies the Razorpay payment signature to confirm authenticity.
5	IRCTC Booking Initiated RailCab initiates the actual ticket booking with IRCTC via the B2C WebView bridge using your linked IRCTC account credentials.
6	IRCTC Confirmation IRCTC processes the booking and sends back the booking confirmation response.
7	Ticket Generated Your PNR is generated and the booking is confirmed. You receive a booking confirmation.

Payment Security

- All payment transactions are secured by Razorpay (PCI-DSS Level 1 certified).
- RailCab never stores your card details or UPI PIN.
- Each payment is verified using HMAC-SHA256 signature validation.
- In case of payment failure, your amount is automatically refunded within 5–7 business days.

3.5 Booking Confirmation

After successful payment and IRCTC booking, you will receive:

- **PNR Number** – Your unique train ticket identifier from IRCTC.
- **In-App Booking Confirmation** – Visible on the Booking Confirmation screen.

- **SMS / Notification** – Booking details sent to your registered mobile number.
- **Email Confirmation** – Booking summary emailed to your registered email address.
- **Booking in History** – Accessible anytime from 'My Bookings' in the app or web portal.

■ Tap 'Check PNR Status' on the confirmation screen to view the latest reservation status of your ticket.

3.6 Train Booking on the Web Portal

The **RailCab Web Portal** offers the complete train ticket booking experience — identical to the mobile app. All steps described in Sections 3.1 to 3.5 are available on the web portal.

Web Portal Access

- Open your browser and go to the RailCab web portal URL.
- Log in with your RailCab credentials.
- Click '**Book Train Ticket**' from the navigation menu or home dashboard.
- Complete the same search → availability → passenger details → payment → confirmation flow.
- Your bookings made on the web portal are visible in the mobile app under 'My Bookings' and vice versa — all data is synced to your account.

Web Portal – Exclusive Features

- **Larger screen experience** – Easier for entering multiple passenger details.
- **Train Schedule View** – View complete station-wise schedule for any train.
- **Admin Panel** – Available exclusively on web for operations team (See Chapter 10).

4. Cab Booking

The Cab Booking feature is the core differentiator of RailCab. It allows passengers to pre-book a cab that is **automatically timed to arrive at the railway station when your train does**. No more waiting for cabs after a long train journey — your ride is ready when you step off the train.

4.1 How Cab Booking Works

RailCab syncs your cab booking with your train's scheduled arrival time at the destination station. The cab driver is notified in advance and dispatched to reach the station pickup point at the right time.

Key Concepts

Term	Explanation
Pickup Location	The railway station where your train arrives — automatically set based on your train booking.
Drop Location	Your final destination — home address, office, hotel, or any location you enter.
Cab Timing Sync	The cab is scheduled based on your train's expected arrival time — not when you book the cab.
Dynamic Pricing	Cab fare is calculated based on distance, vehicle type, and demand at booking time.
Driver Allocation	A nearby available driver is assigned to your cab booking automatically.

4.2 Booking a Cab – Step-by-Step

You can book a cab **during or after your train ticket booking**, or independently at any time from the home screen.

Option A – Book Cab with Train Ticket (Recommended)

1	After Train Booking On the booking confirmation screen, you will see a prompt: 'Book a Cab for Your Arrival' . Tap it to proceed directly.
2	Pickup Auto-Filled The pickup station is automatically set to your train's destination/arrival station.
3	Enter Drop Location Type your drop address or choose from saved locations. You can also pin the drop location on the map.

4	Select Vehicle Type Choose from available cab categories: Hatchback (economy), Sedan (comfort), or SUV (spacious).
5	View Fare Estimate The estimated fare for your selected vehicle and route is displayed clearly before confirmation.
6	Confirm Booking Review the details — pickup station, drop location, vehicle, fare, and timing. Tap ' Confirm Cab Booking '.
7	Cab Booked Your cab is confirmed and a driver will be allocated. You will receive a notification with driver details closer to your train arrival.

Option B – Book Cab Independently

1	Go to 'Book Cab' From the home screen, tap ' Book a Cab '.
2	Select Your Train Booking Choose the linked train booking for which you want a cab, or enter the station manually.
3	Enter Drop Location Enter your drop address or pin on the map.
4	Select Vehicle & Confirm Choose vehicle type, view fare estimate, and confirm the booking.

4.3 Cab Fare Estimation

Cab fares on RailCab are calculated transparently based on the following components:

Component	Details
Base Fare	Fixed minimum charge applicable to all rides.
Distance Fare	Per-kilometre rate based on the distance between pickup (station) and drop location.
Vehicle Type	Hatchback has the lowest per-km rate; SUV has the highest.
Time of Day	Late-night / early-morning rides may have a nominal surcharge.
Applicable Taxes	GST as applicable on cab services.

■ The fare shown at booking time is an estimate. The final fare may vary slightly based on actual route taken or waiting time. The estimated fare is shown clearly before you confirm.

4.4 Driver Allocation & Tracking

Once your cab booking is confirmed, RailCab allocates a nearby available driver to your ride.

- **Driver Details Notification:** You receive the driver's name, vehicle number, and contact number via push notification and SMS — typically a few hours before your train's arrival.
- **Real-Time Tracking:** Track your driver's live location on the map as your train approaches the destination station.
- **Driver Contact:** You can call the driver directly from the app in case of any coordination needed.
- **Driver App:** The driver uses the dedicated RailCab Driver App to accept and navigate to your pickup location.
- **Ride Start / End:** The driver marks ride start when you board and ride end at your drop location.
- **Trip History:** Completed cab trips are recorded in your booking history along with your train bookings.

5. PNR & Booking Management

5.1 Check PNR Status

Check the live reservation status of any IRCTC train ticket directly within RailCab.

1	Go to PNR Status From the home screen or navigation menu, tap ' PNR Status '.
2	Enter PNR Number Type the 10-digit PNR number printed on your ticket or e-ticket.
3	View Status RailCab fetches live status from IRCTC and displays: Train details, passenger names, current reservation status (Confirmed / RAC / Waitlist number), Coach and berth number (for confirmed passengers), and Departure and arrival schedule.

■ PNR status is fetched live from IRCTC APIs and reflects the most current reservation status available.

5.2 View Booking History

Access all your past and upcoming bookings — both train tickets and cab rides — from one unified screen.

- Navigate to **My Bookings** from the bottom navigation (app) or top menu (web).
- The screen lists all bookings with: Booking type (Train / Cab), Status (Confirmed / Pending / Cancelled), PNR or Booking ID, Travel date and route, and Fare paid.
- Tap any booking to view its **complete details**.
- Use the **filter** option to view only Train bookings, Cab bookings, Upcoming trips, or Past trips.

5.3 Cancel a Train Ticket

You can cancel your train ticket directly from RailCab. Cancellation is processed via IRCTC and a refund is initiated per IRCTC's cancellation policy.

Cancellation Flow

1	Go to My Bookings Navigate to My Bookings and tap the booking you want to cancel.
2	Tap 'Cancel Ticket' On the booking detail screen, tap the Cancel Ticket button.
3	Select Passengers If it is a multi-passenger booking, select the specific passengers you want to cancel (partial cancellation supported).

4	View Refund Amount RailCab shows the applicable refund amount based on IRCTC's cancellation rules and the time of cancellation.
5	Confirm Cancellation Tap Confirm Cancellation to proceed. The cancellation request is sent to IRCTC.
6	Refund Initiated IRCTC processes the cancellation and the refund amount is credited back to your original payment method within 5–7 business days.

IRCTC Cancellation Charges (Standard)

- More than 48 hours before departure: Flat cancellation charge per passenger per class.
- Between 12–48 hours before departure: 25% of fare (minimum flat charge).
- Between 4–12 hours before departure: 50% of fare.
- Less than 4 hours before departure or after departure: No refund (TDR must be filed).

5.4 TDR – Ticket Deposit Receipt

If your train was cancelled, significantly late, or you could not travel due to valid reasons, you can file a **TDR (Ticket Deposit Receipt)** to claim a refund even after the train has departed.

1	Go to My Bookings Find the booking for which you want to file a TDR.
2	Tap 'File TDR' Tap the File TDR option on the booking detail screen.
3	Select Passengers Choose the passengers for whom TDR is being filed.
4	Select TDR Reason Choose the appropriate reason from the IRCTC-approved list: Train Cancelled, Train Late (more than 3 hours), Could Not Board due to Train Running Late, etc.
5	Submit TDR Tap Submit TDR . The request is filed with IRCTC via RailCab.
6	Track TDR Status Go to TDR Status in the menu to check the status of your filed TDR. IRCTC processes TDRs within 60–90 days.

■ Always file TDR within the permitted time window as defined by IRCTC policy for your specific reason. Late TDR filings are rejected by IRCTC.

6. Vikalp Scheme

6.1 What is Vikalp?

Vikalp (meaning 'Alternative' in Hindi) is an **IRCTC scheme for waitlisted passengers**. Under this scheme, if your ticket is on the waitlist and is not likely to get confirmed on your booked train, IRCTC can automatically accommodate you on an **alternate train** with available confirmed berths on the same route — at no extra cost.

- Available for waitlisted passengers on selected trains and routes.
- No extra charge — you pay only the fare difference if the alternate train has a higher class.
- Vikalp accommodation is done by IRCTC automatically based on availability.
- You get a confirmed berth on the alternate train instead of travelling on a waitlist.

6.2 How to Opt for Vikalp

1	Check Eligibility Go to My Bookings and tap on your waitlisted booking. Tap ' Check Vikalp Eligibility '. RailCab checks with IRCTC if your booking is eligible.
2	View Alternate Trains If eligible, RailCab displays a list of available alternate trains on your route that have confirmed berths.
3	Select Preferred Option Review the alternate trains — note different departure times and arrival times. Select your preferred train.
4	Opt In Tap ' Opt for Vikalp '. RailCab submits your Vikalp preference to IRCTC.
5	Confirmation IRCTC accommodates you on the alternate train (subject to availability). You receive an updated ticket with the new train and PNR details.

■ Vikalp is subject to IRCTC's eligibility rules. Not all waitlisted tickets are eligible. Eligibility depends on the train, route, and booking quota.

7. Payment & Refunds

7.1 Supported Payment Methods

RailCab accepts all major payment methods via Razorpay:

Payment Method	Options Available
UPI	Google Pay, PhonePe, Paytm, BHIM UPI, any UPI-registered bank account
Debit Cards	Visa, Mastercard, RuPay — all Indian bank debit cards
Credit Cards	Visa, Mastercard, American Express, Diners Club
Net Banking	All major Indian banks — SBI, HDFC, ICICI, Axis, Kotak, and 50+ more
Wallets	Paytm Wallet, Amazon Pay, Mobikwik, Freecharge
EMI	Credit card EMI and No-Cost EMI (selected banks)

7.2 Refund Policy & Timeline

Refunds on RailCab depend on the type of booking:

Train Ticket Refunds

Cancellation Reason	Refund Amount	Timeline
User-initiated cancellation (> 48 hrs before departure)	Fare minus IRCTC cancellation charges	5–7 business days
User-initiated cancellation (12–48 hrs before departure)	75% of fare (IRCTC policy)	5–7 business days
User-initiated cancellation (4–12 hrs before departure)	50% of fare (IRCTC policy)	5–7 business days
Train cancelled by Railways	Full refund (automatic via TDR)	60–90 days (IRCTC processes)
TDR filed – valid reason	As determined by IRCTC	60–90 days
Payment failed / not booked	Full refund	3–5 business days

Cab Booking Refunds

- **Cancelled before driver allocation:** Full refund within 3–5 business days.
- **Cancelled after driver allocated:** Partial refund (platform fee may be deducted).
- **Driver no-show:** Full refund + complaint registered.

7.3 Payment Status Tracking

Track the status of any payment or refund from within the app:

- Go to **My Bookings** and tap the relevant booking.
- The payment status is shown as: **Paid**, **Pending**, **Failed**, or **Refunded**.
- For pending refunds, the expected credit date is displayed.
- If a payment fails but your account was debited, contact support with the **Transaction ID** shown on the payment screen — refunds are processed within 5–7 business days.

8. IRCTC Account Linking

8.1 Why Link Your IRCTC Account?

RailCab books train tickets through IRCTC's official systems. To complete an actual train ticket booking, RailCab needs your IRCTC login credentials to authenticate with IRCTC on your behalf during the booking process.

Why This Is Needed

- IRCTC requires user authentication to issue train tickets under a specific passenger account.
- Your IRCTC credentials are used only at the time of booking — they are stored securely and never shared.
- You can link multiple IRCTC accounts (e.g., personal and family accounts) and set one as primary.
- Without a linked IRCTC account, train ticket booking cannot be completed.

8.2 How to Link / Manage Your IRCTC Account

Linking Your IRCTC Account

1	Go to Profile Navigate to Profile from the bottom navigation (app) or top menu (web).
2	Tap 'IRCTC Accounts' Tap the ' Linked IRCTC Accounts ' section.
3	Add Account Tap '+ Add IRCTC Account'.
4	Enter Credentials Enter your IRCTC Username (Login ID) and IRCTC Password . These are the same credentials you use on the IRCTC website / app.
5	Set as Primary If you have multiple accounts, set your preferred account as Primary — this will be used for bookings by default.
6	Save Tap Save . The account is now linked and ready for bookings.

Managing IRCTC Accounts

- **Edit:** Update your IRCTC password if you have changed it on IRCTC.
- **Delete:** Remove a linked IRCTC account at any time.
- **Multiple Accounts:** Add up to 3 IRCTC accounts (e.g., personal + spouse account for different booking quotas).

- **Primary Account:** Only the primary account is used for train bookings. You can change the primary account at any time.

■ *If you do not have an IRCTC account, register for free at www.irctc.co.in or via the IRCTC Rail Connect app before linking to RailCab.*

9. User Profile & Settings

Manage your personal information, preferences, and security settings from the Profile section.

Setting / Feature	Description	How to Access
Personal Information	Edit name, date of birth, email, and mobile number.	Profile → Edit Profile
Change Password	Update your RailCab account password.	Profile → Security → Change Password
Linked IRCTC Accounts	Add, edit, delete, or set primary IRCTC accounts.	Profile → Linked IRCTC Accounts
Saved Passengers	Save frequently-travelled co-passengers for quick booking.	Profile → Saved Passengers → Add
Saved Addresses	Save frequently-used drop locations (home, office, etc.).	Profile → Saved Addresses
Notification Preferences	Control which push notifications and SMS alerts you receive.	Profile → Settings → Notifications
Language	Change app display language.	Profile → Settings → Language
Logout	Securely log out of your RailCab session.	Profile → Logout
Delete Account	Permanently delete your RailCab account. Contact support.	Profile → Settings → Delete Account

10. Admin Panel Overview

The RailCab **Admin Panel** is a web-only interface available to the RailCab operations team. It provides a comprehensive dashboard to manage all aspects of the platform.

■ *The Admin Panel is accessible only to authorised RailCab staff with Admin or Operations Manager credentials. It is not available to regular passengers.*

Admin Panel Features

Module	Features Available
User Management	View all registered users, search by name/mobile/email, activate or deactivate accounts, view user booking history.
Booking Management	View all train and cab bookings across the platform, filter by status/date/user, view booking details and PNR.
Payment Tracking	Monitor all payment transactions — successful, failed, and pending. View Razorpay payment IDs and amounts.
Refund Management	Process and track refunds, view refund status for cancelled bookings and TDR-related refunds.
Cab Driver Management	Add, edit, activate/deactivate driver accounts. View driver trip history and earnings.
Booking Reconciliation	Run automated reconciliation to match RailCab booking records with IRCTC and Razorpay records. Identify discrepancies.
Platform Statistics	View platform-level analytics: total bookings, revenue, active users, popular routes, and cab utilisation.
Cache Management	Clear API response caches to force fresh data from IRCTC APIs when needed.

Admin Roles

- **Super Admin** – Full access to all modules including user management, financial data, and system settings.
- **Operations Manager** – Access to booking management, cab drivers, and customer support tools. No access to financial configuration.

11. Notifications

RailCab keeps you informed throughout your journey via push notifications, SMS alerts, and in-app messages.

Notification Type	When Triggered	Channel
Booking Confirmed	Immediately after successful train ticket or cab booking.	Push + SMS + Email
PNR Status Update	When your ticket's reservation status changes (WL → Confirmed, WL → RAC).	Push + SMS
Cab Driver Allocated	When a driver is assigned to your cab booking.	Push + SMS
Driver Approaching	When your driver is en route to the pickup station.	Push
Payment Successful	Immediately after payment is processed.	Push + SMS + Email
Payment Failed	If a payment transaction fails.	Push + SMS
Refund Initiated	When a refund is processed by IRCTC or Razorpay.	Push + SMS
TDR Status Update	When IRCTC updates the status of your TDR filing.	Push + SMS
Vikalp Allocation	If IRCTC allocates you to an alternate train via Vikalp.	Push + SMS
Train Cancellation Alert	If your booked train is cancelled by Indian Railways.	Push + SMS
Booking Reminder	24 hours before your train departure.	Push + SMS

■ You can customise which notifications you receive from Profile → Settings → Notification Preferences. SMS and Email alerts for bookings and payments cannot be disabled as they are required for your records.

12. Frequently Asked Questions

Q: Do I need an IRCTC account to use RailCab?

A: Yes — an IRCTC account is required to book train tickets via RailCab. You can register for a free IRCTC account at www.irctc.co.in. For cab-only bookings, an IRCTC account is not required.

Q: Is train booking on the RailCab web portal the same as on the app?

A: Yes — the web portal and mobile app offer identical train booking functionality. Both use the same IRCTC API integration. Your bookings sync across all devices under the same account.

Q: What happens if my payment is deducted but the ticket is not booked?

A: If payment is deducted but the train ticket booking fails, RailCab automatically initiates a refund to your original payment method within 3–5 business days. You can also track this under My Bookings → Payment Status.

Q: Can I book cabs without booking a train ticket on RailCab?

A: Yes — you can book a cab independently from the home screen. Select 'Book a Cab', enter your pickup station, drop location, and preferred vehicle to book.

Q: How is the cab fare calculated?

A: Cab fare is based on the distance from the pickup station to your drop location, the vehicle type selected, and applicable taxes. The estimated fare is shown clearly before you confirm the booking.

Q: Can I cancel only specific passengers from a group booking?

A: Yes — RailCab supports partial cancellation. Go to My Bookings, open the booking, tap 'Cancel Ticket', and select the specific passengers you want to cancel.

Q: What is the Vikalp scheme and who can use it?

A: Vikalp is an IRCTC scheme for waitlisted passengers that automatically accommodates them on an alternate train with available confirmed berths at no extra charge. Eligibility depends on the train and route. Check eligibility from My Bookings.

Q: How do I change my boarding station after booking?

A: You can change your boarding station before the chart preparation deadline. Go to My Bookings, open the booking, and tap 'Change Boarding Station' to select from available boarding points.

Q: Is my payment information stored by RailCab?

A: No — RailCab does not store your card details, UPI PIN, or net banking credentials. All payments are processed by Razorpay, which is PCI-DSS Level 1 certified.

Q: How do I file a TDR if I could not travel?

A: Go to My Bookings, open the relevant booking, tap 'File TDR', select the passengers and reason, and submit. IRCTC processes TDR requests within 60–90 days.

Q: Can I use RailCab for booking only a train ticket without a cab?

A: Absolutely — you can book only the train ticket without adding a cab. The cab booking is optional and can be added later from the booking confirmation screen or My Bookings.

Q: My IRCTC password has changed. How do I update it?

A: Go to Profile → Linked IRCTC Accounts → tap your account → Edit → update your password and save.

13. Support & Contact

If you need help with any feature, booking issue, or payment concern, RailCab's support team is available to assist you.

Support Channel	Details	Availability
In-App Help	Tap 'Help & Support' in the Profile menu for self-service FAQs and to raise a support ticket.	24 x 7
Email Support	support@railcab.in — Include your Booking ID or PNR for faster resolution.	Response within 24 hours
Phone Support	[Phone number to be added by organisation]	Mon–Sat, 9 AM – 6 PM IST
Razorpay Payment Issues	For payment-related disputes, contact Razorpay support with your Razorpay Order ID (shown in payment screen).	Via Razorpay portal
IRCTC Ticket Issues	For IRCTC-specific issues (ticket not issued, chart not prepared), contact IRCTC helpline: 139 or 14646.	24 x 7 (IRCTC)

When Contacting Support – Include:

- Your registered **mobile number or email address**
- **Booking ID** or **PNR number** (if related to a specific booking)
- **Transaction ID** or **Razorpay Order ID** (if related to a payment issue)
- **Description of the issue** with screenshots if possible
- **Date and time** when the issue occurred

This User Manual is for RailCab Version 1.0.
